

## WHERE IS THE MOON?

Name: \_\_\_\_\_ Circle the Week Number: One Two Three Four

Pick a time of the day that will be convenient for you to make daily observations of the Moon in the sky. You must make your observations at approximately the same time each day. It could be in the morning when you get up, at lunch time, when you get home from work or in the evening.

Find the moon in the sky (if it is viable). In all cases, make a daily entry in the following table:

Observation Number	Date	Exact Time	Draw the Moon's Shape	Angle above the Horizon	Weather Conditions
1					
2					
3					
4					
5					
6					
7					

Notes:
