1. Do you think that there was really Plutonium in the test tube shown to General Graves?
2. What scientific ethical principles are involved with the Atom tests that used Soldiers and Marines in Nevada. Would the same ethics apply today?
3. How did nuclear weapons and Mutually Assured Destruction (MAD) change warfare?
4. Why do so many people fear nuclear power?
5. How do you balance the fear of nuclear power against its promise?
